

FROM VISION TO VERSION

DEVELOPER - MANUFACTURER - SUPPLIER

QUICK FACTS

JÄGER Gummi und Kunststoff GmbH
A company of the JÄGER Group

Headquarter in Hanover,
7 sites plus logistics center in Germany
17 subsidiaries at more than 24 locations

ca. 170 employees
ca. 1300 employees

69 million € revenue in 2024
257 million € revenue in 2024

DIN EN ISO 9001 and 14001 certified

**Technical products made of rubber, plastic and
various combinations of materials**

Our main industries:
Mechanical engineering
Agricultural technology
Power engineering
Environmental technology

JÄGER GUMMI UND KUNSTSTOFF OUR STRENGTHS

Our strengths lie in the **expert knowledge** and **consulting competence** we have built up over the decades. Our decentralized structure with a total of eight sales locations throughout Germany enables us to be close to our customers and to offer holistic advice and support as a local contact.

DEVELOPMENT

As a development partner, we design individual and customized products for you. Our benchmark is to meet the **highest quality standards**. For this purpose, we employ a team of experts from product and process development who realize individual parts and assemblies for your specific application.

PRODUCTION

Extensive manufacturing possibilities within the entire JÄGER Group offer you exactly the solution that suits you. We rely on resource-saving and efficient production methods as well as **continuous optimization** of existing processes.

PROCUREMENT

In addition to our own production, we rely on a broad and **reliable network of suppliers**. This means that we are not limited either in our production capacities or in our choice of manufacturing processes, enabling us to provide you with optimum support.

Listening, understanding and offering the right solutions as a reliable partner - that's us!

NEW LIQUID SILICONE MANUFACTURING IN HANDOVER

State-of-the-art liquid silicone injection molding machines (up to 3,000 KN), including **professional cold runner technology**, complement our process portfolio at our main site in Germany.

We realize semi- and fully-automatic, **robot-assisted assembly** facilities for our customers. Primarily, components used come from preceding manufacturing processes (LSR and plastic injection molding). To ensure quality requirements are met, optical measurement systems guarantee **100% inspection** of relevant product features.

Continuous traceability is ensured by applying Data Matrix Codes. Certification according to IATF 16949 is being pursued.

- Establishment of a plastic & LSR injection molding factory with fully automated robot assembly
- Five Engel injection molding machines ranging from 100t to 300t
- 100% inspection using optical camera systems within the automated robot assembly
- Clear part traceability through 2D Data Matrix Code
- IATF 16949 Zertifizierung in Arbeit
