

SOIL PREPARATION TECHNOLOGY

Robust and durable

RUBBER SHOCK ABSORBER

Application

Vibration isolation of the coulter lever on compact disc harrows. Shock absorption.

Material

Field-tested and long-proven elastomer compounds (e.g. NR/BR)

Vibration-
isolating

Break-proof

Weather-
resistant

Temperature-
resistant

Special features

- High-performance components manufactured using the CM/TM/IM rubber moulding process
- Dimensions according to customer specifications
- Long service life thanks to optimally matched elastomer material
- All-in-one: development, production and validation within the JÄGER Group

SCREENING STAR

Application

Separation of stony and cloddy soil.

Material

Field-tested and long-proven elastomer compounds (e.g. PUR, TPU, NR, NBR)

Elastic

Wear-resistant

Hydrolysis-
resistant

Special features

- Tight component tolerances thanks to precise manufacturing processes
- Self-cleaning and long service life thanks to elastic material
